

Submitting Time on a Mobile Device

The Issue

1. The Oracle Mobile app is not able to save time successfully
2. Submitting time via a mobile browser is the only option but it requires a user-driven quick change before they can enter time
3. Steps are below for doing this separately on iOS and Android devices

Steps for iOS

1. Launch application URL from Safari browser
2. Tap on 'AA', and then select Request Desktop Website
3. Login using "Company Single Sign-On"
4. Go to the Time Entry screen and enter time as needed

Steps for Android

1. Launch the URL from any browser preferably Chrome or Firefox, tap on 3 dots on right top corner
2. Select Desktop Site and click on Go
3. Login using "Company Single Sign-On"
4. Go to the Time Entry screen and enter time as needed
