Submitting Expense Reports

This guide outlines the process of submitting expenses incurred for reimbursement, which were not paid by PCard.

Purchase Card reconciliation instructions can be found at GMHEC.org/Support

1. Enter Purpose and add Expense Items

Enter the reason for the expenses under **Purpose** *(should be relevant to help you identify it later)*

Click **+ Create Item** to add an Expense Item to the report

1.3 Add Expense Item Info

Select the expense **Type** from the dropdown and fill out the available fields. *( * Indicates Required Field)*

➢ **Note:** Merchant Name is now a required field. This should be the name of the vendor listed on the corresponding receipt.

➢ The fields will change depending on the expense type selected.

➢ **Note:** Foreign Currency - If an expense was paid for in a foreign currency, please use the Amount dropdown to select that currency, then enter the amount that matches the receipt. Then enter the appropriate exchange rate for that day, and Oracle will do the math to show the amount in USD.

Click **Drag files here or click to add attachment** OR drag a file to attach a RECEIPT to the Expense Item

**Note:** Either upload a file, or add a link – which will be especially useful for mileage reimbursements to show a map of the distance travelled.

**Tip:** Scan and email receipts to a computer using an application called **Genius Scan**, which can be downloaded from a smartphone’s app store

**Note:** Verify the account number (EDORDA) is correct!

**Note:** Ensure the Designation field is completed and matches the designation entered in the account number.
1.3 (Cont.)

NOTE: Do not attach any receipts/ supporting documentation that include any PII (personal identifiable information – e.g. SSNs, addresses, telephone numbers, etc.)

TIP: We recommend all receipts be individually attached to the expense item that it corresponds with to allow for faster processing.

For any lost receipts, please check the Receipt Missing box, and provide a Justification for the missing receipt.

Once all fields are filled out and the receipt is attached, click Save and Close to return to the Expense Report.

If there are other transactions which need to be added to the report, select Create Another.

Repeat this step for each Expense Item.

1.4 Verify Expense Item information is correct

After creating all transactions for the Expense Report, verify that the information provided is correct for each Expense Item.

Note: If you have multiple expense items within the report that have the same attributes (date, amount, merchant, etc.,) the system may detect a duplicate.

If the expenses are legitimate, choose to Keep these expenses. If they are duplicates, you can choose to Delete one of the listed expense items.
If information needs to be changed for any transaction, edits can be made by clicking back into the Expense Item, or from this screen. Type, Description, and Attachments can be altered from this page.

The box displayed below must be checked to indicate the employee has read and accepts the travel and expense policy. Click on the link to view the policy.

Clicking Submit will send the Expense Report for supervisory approval. Once a supervisor has reviewed and taken appropriate action on the expense report, the employee will receive an email that it was Approved, Rejected, or Requesting Further Information. The note associated with the latter two should provide instruction on how/what to correct. Once approved, the expense report may require audit by Accounts Payable, but should be processed in the next payment run.

TIP: Ensure your Bank Account has been added to the Expense module in Oracle to receive your Direct Deposit payment.
Audit Review – for compliance purposes, after approval a set percentage of randomly selected Expense Reports are routed for additional review by Accounts Payable or other staff acting in an ‘auditor’ role. This will also result in being Approved, Rejected, or Requesting Further Information. If one of the latter two, please respond back in a timely manner so reimbursement is not delayed.

➢ Most common reasons for Expense Report to NOT be approved in Audit stage: Avoid these if possible!
  o Receipt does not match the amount in the report line item
  o Receipt missing box not checked, or there is no explanation for missing receipts
  o Incorrect Expense Types (ex: Mileage selected, but receipt is clearly for a Meal)
  o Mileage Reimbursement without appropriate backup
